
Serverless computing

Mouloud Menceur*[†]

¹Université Paris-Dauphine – Université Paris Dauphine - Paris IX – France

Résumé

How to build, deploy and run applications, without dealing with any infrastructure or back-end services, by executing code in fully managed cloud services? A practical introduction to Serverless Computing and its benefits.

Keywords: Software architecture, Cloud computing, FaaS, BaaS, AWS Lambda

Mouloud Menceur is an IT professional with broad experience in distributed systems and software architecture.

He is also involved in the academic area as a lecturer and adjunct professor at Paris-Dauphine University since 14 years.
